The following offers are made subject to prior sales, and on the following conditions.

Terms:—Cash with order. Orders for less than \$2.00 include postage. Orders of \$2.00 or more prepaid. Printed culture directions sent with each order. On early orders a deposit of 25% of the amount of order will hold it for later delivery. Balance before shipment or C. O. D. Address all orders to **Dayton's Dahlia Gardens, 647 N. Main St., Akron, Ohio.**

Guarantee—We guarantee every root and plant sent out by us to be true to name, and in a healthy condition when received, after which responsibility ceases, as we have no control over growing conditions, and in no case will we be responsible for anything over Purchase Price. On late orders we would appreciate a second and third choice.

CALIFORNIA'S "GREAT JOY" DAHLIA SEED PARENT TRIAL GROUNDS

Mail Address

P. O. Box 366, Oceanside, California

A private enterprise, started for the purpose of getting world wide information concerning good dahlia seed parents and the possibility of increasing the percentage of good dahlias from known or possible seed strains.

Dahlia growers heard of this and offered to co-operate by exchanging their best dahlias for seed and for information concerning tested seed parents and best available seeds.

Experienced growers in various states also offered to assist in testing out seeds and new originations by establishing local trial grounds for the purpose of giving the widest possible test of performance under varying soil and climatic conditions.

Growers in the leading dahlia growing sections of America are now co-operating in bringing together in this favorable California location the best known dahlia seed parents of the world and in testing out their possibilities.

Three main lines of experimentation are started with exhibition, cut flower and European cactus varieties. From these an effort will be made to produce reliable seed strains which will give GREAT JOY to dahlia lovers everywhere.

The hope is cherished that this experimental work started as a hobby, under private initiative, may eventuate in **NATIONALLY SPONSORED Seed Parent Trial Grounds** in the United States and in other countries.

So that dahlia growers every where may freely obtain needed information concerning the best possible seed parents and available reliable seed strains for originating **NEW DAHLIAS OF MERIT.**

DAYTON'S DAHLIA GARDENS

OUR NAME "GREAT JOY" was selected for several reasons but one very obvious reason is that the greatest joy that can come to a dahlia lover is to originate a really great dahlia and to name it after a loved one. Mr. Taylor of West Virginia, one of our co-operating members, originated Mary Taylor. We can all share his joy by reading the following from a recent letter received from him at our trial grounds: "I have had the most thoroughly enjoyable and satisfactory season I have ever had with my dahlias—First my Cactus MARY TAYLOR (named for my mother) had a fine season at Storrs, Conn., getting the high score of 86 and specially mentioned as THE OUTSTANDING DAHLIA OF THE TRIAL GARDENS. However, my greatest thrill came at our recent State Dahlia Show where I had two blooms of a new two-year-old red seedling. One bloom was judged as BEST RED, as best of all single entries and also took first as BEST BLOOM IN THE SHOW." Only God can make a tree or create a flower, but the supreme satisfaction that one gets from a consciousness of Laboring Together with God in originating a new and lovely dahlia is GREAT JOY INDEED.

HOW TO GET "GREAT JOY" DAHLIA SEED

Send cash with all orders to Dayton Bond, 647 North Main St., Akron, O.

This is the first year when seed has been offered and this year the supply offered to the public is VERY LIMITED because those responsible for the seed parent trial grounds desire to distribute an ample supply of seeds to the CO-OPERATING MEMBERS who agree to test out the various strains under local trial ground conditions and to report back to the California gardens in detail as to results. It is only in this way that a fair check can be made on trial garden results.

The Seed Parent Trial Grounds wish to make it clear that their work is as yet in a very experimental state and for that reason they offer a limited supply of seeds for testing in local gardens with the definite understanding that, until our own trial grounds and our co-operating members have had opportunity to test results, we make no recommendation and give no guarantee as to results.

For those who wish to join with us in trying out something new and who are willing to report results of planting this particular brand of seeds we offer a limited supply of the past seasons crop at the following prices. When supply is sold out, money will be returned on any unfilled orders as the rule will be "First come, first served."

Twenty seeds, both parents named	\$2.00
Twenty seeds, one parent named	1.00
Twenty five seeds best mixture, Exhibition sorts	1.00
Twenty-five seeds best mixture, Cut Flower sorts ...	1.00
Twenty-five seeds best mixture, Holland Cactus sorts	1.00
Miniature and Pompon seeds, 50 seeds	\$1.00

We do not fill smaller orders and larger orders are a matter of correspondence this season.

COLLECTION C

We always have a quantity of roots that get mixed through handling, or labels become detached or lost. These we offer at a great savings to you. 10 large type dahlias unlabeled as long as they last for \$1.25. Five collections for \$5.00.

LABELS

Copper wire dahlia labels, 30 cents per 100, plus postage unless shipped with root order. 1,000 labels \$2.75 postpaid. Plain.

Pot labels \$2.00 per 1,000 5 inch, \$1.50 per 1,000 for 4 inch plain.

Weather-proof marking pencils. Will not wash off or blurr. You will appreciate one of these pencils. Only 15 cents each or two for 25 cents.

We grow many varieties of which we do not have sufficient stock to catalogue. If interested in varieties not listed, please write us. We may have them and will quote you the best price possible.

Rooted cuttings a matter of corresponding.

Care of Dahlias

Dahlia seeds may be sown in flats indoors or in hotbeds out of doors during the months of March and April. Indoors sow in flats using a fine mixture of soil, and leaf mold, or both. Settle the soil well and dampen before sowing the seeds. Place the seeds about an inch apart both ways, and then cover lightly just enough to cover the seed. Covering may be of the same soil or pure sand. Wet a cloth or burlap and lay flat on the soil until the seeds germinate, which should be in three or four days, and some will take as long as three weeks so don't disturb the seeds for at least three weeks as some will appear after the first ones have been transplanted. Keep the soil damp at all times during the germination period. When large enough to handle, pot them in small pots and later in larger ones in which they may remain until ready to set out which should be as soon as danger of frost is past. Plant and care for the seedlings same as plants or roots. Seedlings will most always bloom before plants from roots or rooted cuttings.

FERTILIZING

In general it is not wise to fertilize dahlias at planting. In case this is done take care that fertilizer does not come in contact with or near to the tuber or plant.

First, plant in good productive soil, Second, see that the soil contains each season a good portion of humus. Rye sowed each fall after dahlias are dug and spaded or plowed under when of suitable height in the spring will liven the soil and provide some humus. Well rotted manure is good and should be applied in the fall or winter, never in the spring.

Avoid all chemical fertilizers containing more than 4% nitrate. Be sure to use the old-fashioned mixed type of commercial fertilizers. This should be applied starting in July at two week intervals, spreading between the plants and raking or cultivating into the top soil. Twenty-five pounds per season for 100 dahlias is about right. Bone meal and wood ashes mixed with the fertilizer is excellent.

For run down soil we recommend rotted manure and the fertilizer top dressings as described below. Fresh manure of any kind should never be used.

Cut Flowers in Season. We do baskets and spray
work at reasonable prices.
